

SPARES AND EQUIPMENT TO BE CARRIED BY ALL BASH CARS

The following list of equipment is to be supplied and carried by each Bash vehicle in the event of a mechanical breakdown. It is the responsibility of the registered owner/s of the vehicle to ensure that these items are stored in the vehicle prior to the commencement and during the event. MW's may be able to assist with breakdown repairs. They are not responsible to sourcing the broken item. All endeavours will be made to make the temporary repair of a vehicle.

<input type="checkbox"/> Brake Fluid 0.5 Litres
<input type="checkbox"/> 5 Litres of Water |

If electronic ignition fitted, a spare module is to be carried

If your car is fuel Injected then the following **MUST** be carried

- Fuel pump & gasket
- Electronic control unit (ECU)
- Ignition module & coil
- Map sensor
- Crank angle sensor
- Coolant temp sensor

(These items are reasonably inexpensive and physically quite small should all fit in a shoebox size container)

The items listed above have been supplied in the nominated Bash Vehicle
