

2022 4WD Adventure Event ONLY

Camper Trailer Requirements

- Electric brakes required >750kg
- Minimum of 31 inch All Terrain LT tyres including 1x spare tyre
- 4WD style wheel hubs and bearings including spare complete bearing assembly
- 3 axis Tow Coupling, eg Treg/DO35
- Trailers must be self-sufficient with adequate power for a 3 day stay.
No 240v power will not be available at either campsite for entrant/trailer use.

**Trailers outside these specs will be considered and approved with past trip experience and tow vehicle capabilities taken into individual consideration.

The trailer transport route will traverse sealed country roads and the steep accent of Mount Hotham.

Unsealed roads include Dargo High Plains Road, McMillan Road, Jamison to Licola Road, & Howqua Hills Road. These unsealed roads are poorly maintained with large pot holes/puddles, corrugations, tree debris and washaways. Whilst not technical, roads require a high level of concentration and often the use of low range to avoid transmission over heating issues. Tracks are extremely narrow in sections and may require the trailer to pull to the side or off the track to allow for oncoming traffic.

Entrant Approval Process

The trailer will need to be approved by Variety SA, please email the following detailed photos for approval

1. Side Profile Photo
2. Rear Profile Photo
3. Underneath Photo showing axel and suspension
4. Tyre and Wheel
5. Length and Wheel Track Measurement
6. Weigh Bridge Receipt or Build Plate with GVM Weight
