

Variety SA 2022 AUSSIE MUSCLE CAR RUN

COVID-19 Safe Plan

Registration Night:

- All entrants and officials to be RAT tested by Doctors (Day 0) at The Terrace.
- If a negative result is then returned from the PCR test, the entrant or official will be permitted to return to the event.
- It is highly recommended that the Driver and Co-driver come separately to Registration Night if they are not part of the same household.
- If a Driver or Co-Driver tests positive to Covid but their partner tests negative, please see the Event Chair for permission to start the event with one person for a period of 48 hours while a replacement can be found.
- If both participants test positive during the RAT test then the vehicle must leave the event immediately after consulting with the Doctors.
- A second RAT test will be conducted on Day 4 at McCracken Country Club prior to dinner. A negative test will be required to continue on the event.

On event:

Entrants to maintain social distancing and be reminded by Covid Marshals.

All entrants will be provided with hand sanitiser and Officials will carry a supply.

No Entrants or Officials will be permitted to travel in another vehicle at any time during the event. ie: No vehicle swapping

Key current Covid 19 Action plan measures require all participants to apply by the rules of each venue we enter. There may be some variations to restrictions between venues we visit & any rules will be enforced by the venue. Current rules require 1 person per 2 square metres under current Covid restrictions, however this may change prior to, or during the event.

All Entrants & Officials are encouraged to wash hands regularly.

Where possible all "cash bars" will be "cash less" and entrants advised prior.

In addition to abiding by the existing AMCR rules and regulations, anyone who becomes unwell must report to a AMCR Doctor or Official immediately, wear a mask when transiting public spaces, seek medical assistance and get tested that day. This will also apply to their team member

Event COVID 19 Evacuation Plan

- Individual must immediately self-isolate from the event in team vehicle / accommodation and withdraw from the event.
- In accordance with SA Health instructions, close contacts and team members also must self-isolate from the event and withdraw from the event.
<https://www.sahealth.sa.gov.au/wps/wcm/connect/public+content/sa+health+internet/conditions/infectious+diseases/covid-19/testing+and+tracing/close+contacts>
- Accommodation providers must be informed of the situation.

Who is a close contact?

In South Australia a 'close contact' is defined as:

- a household member or intimate partner of a person with COVID-19 during their infectious period
- someone who has had close personal interaction with a person with COVID-19 during their infectious period:
 - for 15 minutes or more and
 - where masks are not worn by the person and the COVID-19 case and
 - in close physical proximity (within 1.5 metres) and
 - in an indoor setting
- someone who has been notified by SA Health that they are a close contact
- someone who has been to an [exposure site](#) listed on the SA Health website.

What does a close contact need to do?

If you live with someone who has tested positive to COVID-19 and you cannot appropriately quarantine away from them, you must quarantine for 14 days from the date their test was taken. You do not need to have a COVID-19 PCR test unless you develop any symptoms.

If you are a close contact and do not live with someone who has tested positive, or you can appropriately quarantine away from them, you must follow the below advice for close contacts:

- immediately quarantine for 7 days since you saw the positive case
- get a PCR test immediately and
- again on day 6 after exposure (a negative day 6 test is required to be released from quarantine) **OR** if no COVID-19 symptoms, rapid antigen test on day 1, 3, 5 and 7 (alternative days) after exposure
- get a PCR test again immediately if symptoms develop
- not attend high risk settings or COVID Management Plan events for 14 days after exposure
- wear a surgical mask when around others

- avoid contact with vulnerable people (young children, elderly, pregnant, people with chronic health conditions), avoid non-essential activities, avoid working across worksites and avoid shared spaces and maintain physical distancing on days 8 to 14 after exposure.

Fun stops will fall into line with the relevant restrictions around food/ beverage / social distancing.

The medical team to have Personal Protective Equipment in the unlikely event that we have to deal with a suspect case.
