UHF Radios	Entrants and Officials Channel 10
LeadNav	Instructions for using LeadNav for iPad

UHF RADIOS

Our most important role is to uphold the reputation and integrity of the event and the Variety brand - we must set a good example.

UHF radio protocol should be the call sign of the person you are calling followed by your own call sign.

Eg. "Car 41 this is Car 03, do you receive? – await response.

A UHF radio with external antenna is required to be fitted to every vehicle and be in good working order and if a radio is not working, please arrange an OV to repair or replace your radio.

UHF radio is for safety reasons and must not be used as general chitchat. Under no circumstances should there be controversial conversation and there is a zero tolerance to bad language.

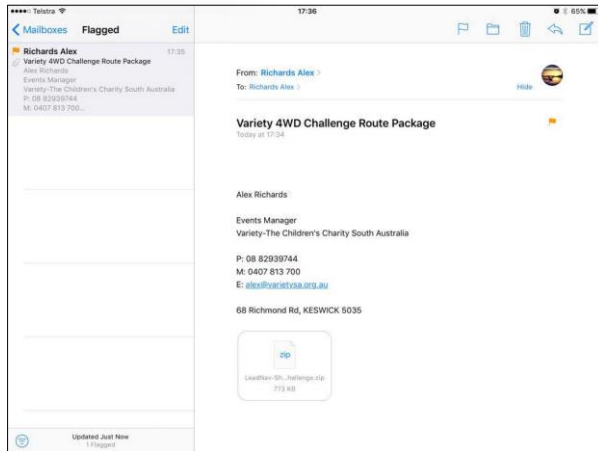

VARIETY EVENT CHANNEL UHF 10

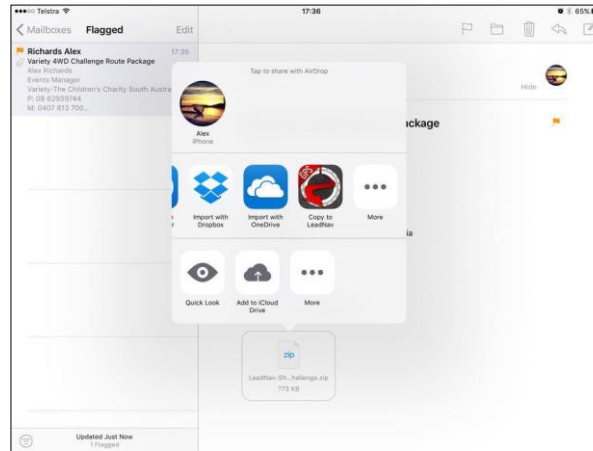

Opening LeadNav .zip files from your email

See website and YouTube for more details <https://leadnavsystems.com/>

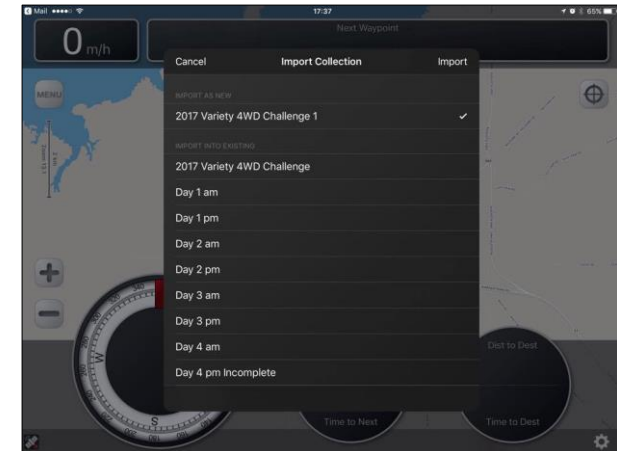

YouTube: Leadnav Systems

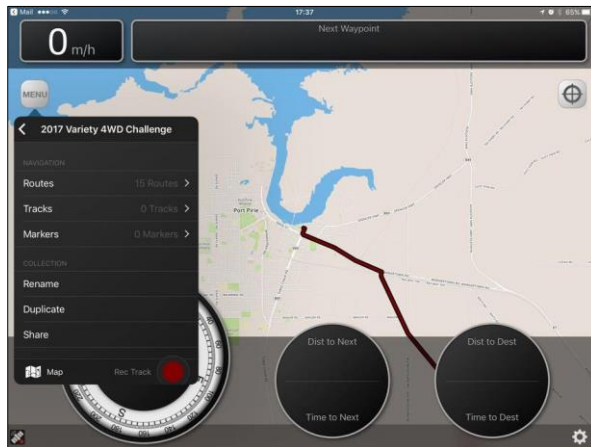

Open the email & Press and hold this attachment

Tap Copy to LeadNav icon

Tap Import

Once Imported, Tap Menu > Collection > Routes > Day 1am (ect) > RUN

This is the same process for opening Location Tracking from other users via email or text message.

Open the email/ text & Press and hold the attachment.

“Select Copy to LeadNav.”

If the press and hold doesn't work,

Single press the attachment → Then press the Square with a Vertical arrow (Top Left) → Copy to LeadNav.

Navigation – LeadNav for iPad

To quit the application or reset due to Freeze

Double Press Home Button → Swipe up to quit application

Re open App ensure you turn back your Location Tracking.

Please note that when using the application, battery usage will be higher than normal.

Hardware Requirements for Leadnav

Apple Compatibility

Note: All iPads must be **cellular version**, sim card not required but preferred.

iPhones 6, 6S, 7, 8

iPads Air 2, Pro, Mini Cellular/Wifi

Minimum 8gb of Hard drive space available and preferable to be minimum 64GB/128GB model.

If iPad does not have provision for sim card, then external Bluetooth GPS must be used.

Android is currently not supported by LeadNav and you must use the alternative oziexplorer app.

Charging Requirements:

iPads must use a **2.4Amp** 12V Cigarette Plug with only a **Genuine Apple Lightning Cable**.

iPhones should use a minimum **1amp** 12V Cigarette Plug and **Genuine Apple Lightning Cable**.

Non Genuine Cables do not charge correctly and you will find the device will go flat over the course of the day even though it is charging. If this is the case try lowering screen brightness or turn off things like wifi, Bluetooth.

For Best Results use a Scorsche REVOLT USB charger available from Variety Office and your Genuine Cable

Mounting Requirements:

Recommend RAM Mounts twin suction cup mount for windscreens or Velcro for other mounts. Available from Ramsey Bros and Variety SA Office.
